

TECH BRIEF

MultiCloud Link

aruba.it
ENTERPRISE

MultiCloud Link

The private connectivity solution for all public cloud platforms.

MultiCloud Link gives you the option of having one or more connections from an infrastructure with Aruba Enterprise **Colocation, Private Cloud** or **Dedicated Cloud** to additional environments distributed on **public cloud platforms**:

- Amazon Web Services
- Microsoft Azure
- Google Cloud
- Oracle Cloud
- IBM Cloud

MultiCloud Link: the service model

MultiCloud Link is available in various **bandwidths up to 1Gbps**, with the option of creating a **dedicated 10Gbps connection**.

Commitment

12 months / 24 months / 36 months.

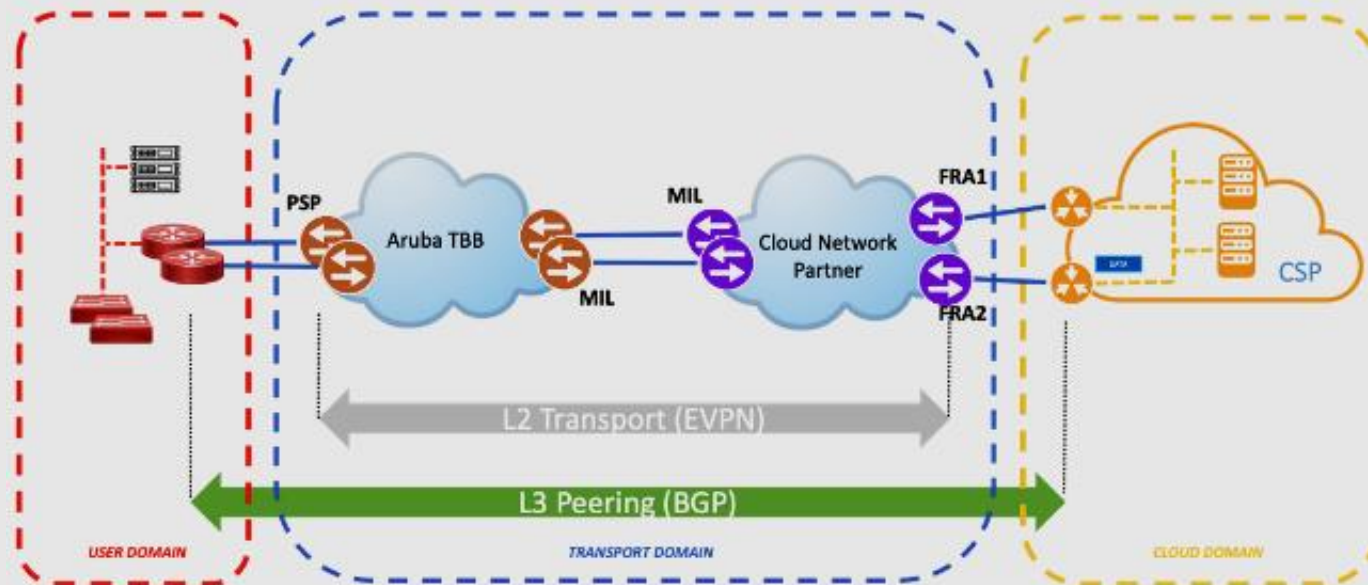

Managed Services

Ability to use the service managed by Aruba.

SLA

Up to 99.99%/year for a redundant infrastructure (double link).

MultiCloud Link: configuration

END-TO-END ARCHITECTURE

A physical device (router/firewall) at the data center is interconnected with the cloud service provider's virtual router in a BGP session.

BGP SESSION

The routes of the networks that need to be visible are exchanged thanks to the BGP session.

REDUNDANCY

When there is a double circuit, the BGP will route/balance the traffic, as well as determining the failure of a route.

MultiCloud Link: use cases

Colocation interconnection

The colocation infrastructures hosted at Aruba Data Centers can communicate with hyperscalers.

VM management

Management of virtual machines, distributed on various public cloud environments.

Workload management

Infrastructures that rely on Aruba's cloud can distribute workloads across multiple environments.

DRaaS and Backup

Ability to replicate data distributed on public cloud infrastructures for the purposes of data sovereignty.

Cloud application

Integration of the applications distributed on different public clouds.

Hyperscaler peering

Activate peering interconnections with hyperscalers securely.

MultiCloud Link: benefits

MultiCloud and security

Direct, private connection to public clouds, without passing through the Internet.

Performance

Guaranteed latency for mission critical applications.

Speed

Bandwidth up to 10Gbit.

Cost effective

Competitive price.

Looking for tailor-made signature solutions, exclusively for your business? Create one with us.

Our team of solution architects works alongside companies to design comprehensive, flexible and customized Electronic and Digital Signature Solutions, to meet even the most complex business needs.
